InnoTrans 2022

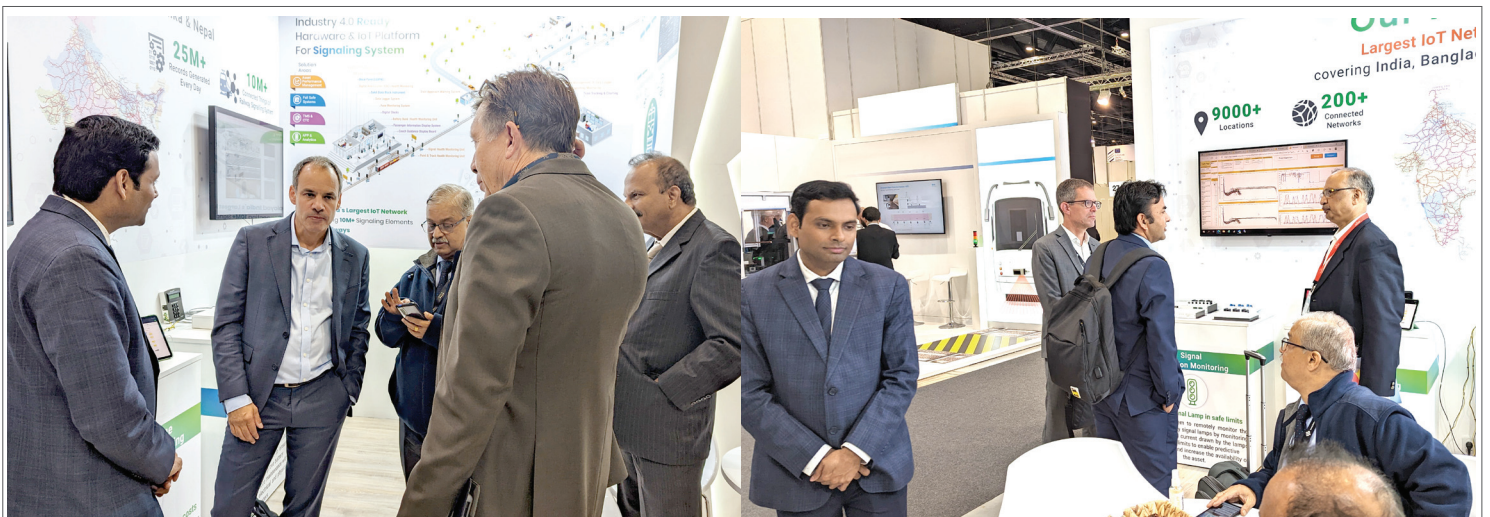

“Efftronics exhibited trending technologies on world stage at international event -Berlin, Germany”

Efftronics Systems Pvt. Ltd. has participated in InnoTrans, the leading international trade fair for transportation technology, which is held in Messe Berlin from 20 to 23 September, 2022. About 2,950 exhibitors have participated from 60 different countries across the world.

World has been witnessing adoption of Industry 4.0 solutions across domains and transportation industry is no different. Because of the pandemic, this adoption has accelerated in the railway transportation industry in rapid pace. At InnoTrans 2022, Efftronics has addressed these trends by showcasing innovative smart solutions such as Predictive Maintenance System for signaling assets through remote condition monitoring. These solutions improves the mean-time-to-repair (MTTR) and availability of assets for use.

“Since few years now, Efftronics is making significant R&D efforts to build IoT solutions and digital twins for signaling assets. This years edition of InnoTrans exhibition gave us a great opportunity to showcase our technological solutions to the global customers. This year, we have visitors from Japan, South Korea, US, Brazil, and from Europe. They showed immense interest in our products and capabilities. We see a possible expansion of Efftronics products and solutions in international markets.” said Dasari Anvesh, Vice - President of Efftronics.

Sri Dasari Anvesh, Vice - President of Efftronics, explaining various solutions developed by Efftronics Systems Pvt. Ltd. , to the visitors in Berlin, Germany.
